ABOUT ME

Results-driven Web Developer specialized in creating modern, mobile-first websites. Proficient in MERN Stack and committed to writing clean, maintainable code. Always looking for new challenges to solve through technology.

EXPERIENCE

Frontend developer

- Collaborating with the broader development team.
- Overseeing website design, content management, and SEO, including marketing, branding, and logo design.

Office management

- Documentation & Reporting: Leveraged Microsoft Word and Excel to maintain project documentation and track development milestones.

Digital marketing

- Social Media Management: Content scheduling and community engagement.
- Content Creation: Writing blogs, captions, and basic graphic design
